

ROMIL SRIVASTAVA

B.Tech Computer Science Engineering Student

+91 1234567890 romilfzd@gmail.com linkedin.com/in/romil-srivastava-316261296 Ayodhya, Uttar Pradesh (224001)

SUMMARY

Motivated B.Tech Computer Science student with expertise in AI/ML, Cloud Computing, and Full-Stack Development. Patent holder for an AI-powered pricing engine and experienced team leader as NSS Head. Strong problem-solving, collaboration, and technical skills, seeking a Software Engineering Internship or Entry-Level Software Developer role to contribute to innovative technology solutions.

EXPERIENCE

NSS Head (National Service Scheme)

National Service Scheme (NSS) — University Chapter Leader

03/2025 - 03/2025 Dehradun, Uttarakhand

University in Uttarakhand, India

- Led and mentored 120+ member NSS chapter, planning and executing 10+ community outreach programs, health camps, and social awareness drives; represented the university at state-level NSS events.
- Organized and mentored on-campus technical workshops and hackathons, boosting student participation by **40%** and developing strong project management, team coordination, and public speaking skills.

Backend Development Virtual Internship

Forage — Virtual Internship

05/2025 - 05/2025 Dehradun, Uttarakhand

Self-paced Online Program, India

- Completed a virtual backend development internship, building and deploying simulated real-world projects using Node.js and MongoDB.
- Gained hands-on experience in REST API design, database management, and server-side logic through structured industry-level tasks and assignments.

Python Developer

Self-Initiated / Academic Projects

2023 - Present Remote

Developed Python-based applications and web projects, while being mentored by industry resources and structured learning programs.

- Built and deployed a Django web application with SQLite database, user authentication, CRUD operations, and REST API integration, applying OOP principles across multiple Python scripts to improve code reusability and efficiency.
- Managed project repositories on GitHub with structured branching, designed responsive front-end pages using HTML, CSS, and JavaScript with Django templates, and handled local server setup and script execution via Linux CLI.

EDUCATION

Bachelor of Technology - Computer Science & Engineering

Graphic Era Hill University

08/2023 - Present Dehradun, Uttarakhand

KEY ACHIEVEMENTS

Patent Filed

Patent Filed for the AI-Powered Dynamic Pricing Engine with Emotional Sentiment Tracking, showcasing innovation in the AI/ML space

Built a full-stack Django web application

Developed an end-to-end web app with user authentication, SQLite database, REST API integration, and responsive HTML/CSS front-end, demonstrating complete backend-to-UI development capability.

Maintained clean version control across 4+ GitHub repositories

Structured all projects with proper branching and commit history, reflecting industry-standard collaborative development practices.

PROJECTS

AI-Powered Dynamic Pricing Engine

04/2025 - 07/2025

An AI-Powered Dynamic Pricing Engine with Emotional Sentiment Tracking, designed for dynamic price adjustments based on emotional sentiment

- Built an AI-powered dynamic pricing engine using NLP sentiment analysis and ML regression models to correlate emotional sentiment with demand elasticity, achieving an 18% simulated revenue uplift.
- Engineered a FastAPI + AWS Lambda REST API for real-time pricing updates, integrated with Amazon S3 for data storage and CloudWatch for performance monitoring.

Smart Campus Management System

01/2024 - 01/2024

A full-stack web application facilitating management of campus activities and resources

- Created a full-stack web application enabling students and faculty to manage attendance, assignments, and notices via a responsive React.js dashboard. Implemented secure JWT-based authentication with role-based access control and built over 20 REST API endpoints using Express.js. Optimized MongoDB queries, reducing average API response time by 35%, and deployed on AWS EC2.

Serverless Notes App

02/2026 - 05/2026

Serverless Notes App — Cloud-Native Full-Stack Application

- Developed a cloud-native serverless notes app with React.js frontend, JWT authentication, and REST APIs built on AWS Lambda & API Gateway using Node.js.

SKILLS

AI / ML	Cloud Computing		AWS	
Python	Java	C/C++	JavaScript	
SQL	HTML	React	Node.js	Flask
TensorFlow		Pandas	Sentiment Analysis	
Docker	MongoDB		PostgreSQL	OOPS
Full-Stack Developer			Backend Developer	
DBMS	Team Building			

Project Planning & Coordination
